

KPI Report

Dashboard KPIs

The dashboard tracks five primary KPIs: Total Quantity Sold (5K), Average Order Value (140.52K), Sum of Unit Price (25.49M), Total Orders (992), and Total Sales (139.40M).

KPI Definitions

Total Sales measures total revenue. Total Orders counts completed orders. Total Quantity measures units sold. Average Order Value measures the average spending per order. Sum of Unit Price represents the cumulative unit pricing across products.

KPI Interpretation

The high total sales indicate strong revenue generation. Nearly one thousand orders demonstrate healthy transaction volume. Average Order Value indicates customers place comparatively high-value orders. These KPIs provide an executive-level summary of business performance.

Recommendations

Track KPI trends monthly, compare KPIs across cities and categories, and use dashboard filters to identify performance variations.
